CORE SKILLS:

- **Backend & Architecture:** Node.js, NestJS, Express.js, TypeScript, REST APIs, GraphQL, Microservices, API Integration, Kafka, Redis
- **Frontend:** React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Material UI
- **Databases:** PostgreSQL, MongoDB
- **DevOps & Tools:** Docker, Git, GitHub, Containers, Jenkins, Grafana, Prometheus
- **Integration & Auth:** JWT, Third-party APIs, Payment Gateways, WebSockets

EDUCATION:

BCA – Aishwarya College of Education
2022 – 2025

12th (Commerce with Computer Science) – Sir Pratap Senior Secondary School
2022

10th – Sir Pratap Senior Secondary School
2020

LANGUAGES:

- English — Native
- Hindi — Fluent

PROFESSIONAL SUMMARY:

Software Engineer with hands-on experience in building scalable backend systems, third-party integrations, and domain-driven platforms in the ISP (Broadband Management System) ecosystem.

Specialized in API integrations, microservices, and workflow orchestration, with strong expertise in Node.js, NestJS, and TypeScript. Experienced in designing integration layers connecting BMS with multiple external systems including IPTV, OTT providers, CRM, inventory, and billing systems.

Passionate about building production-grade systems, automation platforms (iPaaS), and clean, scalable architectures.

PROFESSIONAL EXPERIENCE:

Software Engineer
Intellidata Tech Solutions Pvt. Ltd., India
May 2025 – Present

- Engineered and maintained core modules of a Broadband Management System (BMS) using Node.js, Express, and React.
- Integrated multiple third-party systems with BMS including RSoft, Inventory Management Systems, CRM platforms, Ticketing systems, OTT/IPTV providers
- Architected secure authentication flows, payload mapping, and transformation layers for heterogeneous APIs.
- Enabled reliable integrations by introducing retry strategies, structured logging, and error-handling mechanisms.
- Built an IPTV management system from scratch using NestJS, TypeORM, and PostgreSQL, supporting subscription lifecycle and middleware communication.
- Optimized backend services using modular architecture and scalable API design patterns.
- Collaborated with frontend and QA teams to ensure smooth delivery of production-ready features.

Projects:

- **NGO Saathi (SaaS Platform)**
 - Built a full-stack SaaS platform enabling NGOs to manage donations, volunteers, inventory, and events.
 - Created role-based dashboards for NGOs, donors, and volunteers.
 - Engineered scalable APIs and real-time features including chat systems and analytics dashboards.
- **iPaaS (Integration Platform as a Service)**
 - Building a scalable integration platform to connect multiple systems and APIs.
 - Orchestrating workflows with fan-out execution and transformation pipelines.
 - Enabling retry handling and fault-tolerant execution.
